NET ASSET BACKING OF ENTITIES IN THE 360 CAPITAL REIT

AUSTRALIAN CAPITAL GAINS TAX

A 360 Capital REIT stapled security comprises two separate assets for capital gains tax purposes; a 360 Capital Passive REIT unit and a 360 Capital Active REIT unit 1.

For capital gains tax purposes you need to apportion the cost of each stapled security and the proceeds of sale of each stapled security over the separate assets that make up the stapled security. This apportionment should be done on a reasonable basis.

One possible method of apportionment is on the basis of the relative net tangible assets of the individual entities. For your information these percentages are set out below:
